

## Tournament Director's Payout Matrix Guide

### Winning Distributions (\$5.00 Entry Fee)

Guide is designed to pay approximately one-third of the field

A - Determine the amount of prize money available for "Closest" and "Longest"

"Closest to the Pin" and "Longest Putt" payouts will be worth \$10 each:

- a. 24 players or less - no closest and no long putt
- b. 24 - 35 players - one closest and one long putt (\$20)
- c. 36 - 47 players - one closest and two long putts (\$30)
- d. 48 or more players - two closest and two long putts (\$40)

B - Determine the number of Flights

Number of flights:

0 - 23 players = 1 Flight

24 - 47 players = 2 Flights

48 or more players = 3 Flights

C - After "Closest and Longest" payouts, determine the amount of money available per flight.

D - Balance the number of players in each flight, by index, as close as possible.

(See "Flight Balancing" below.)

E - Award the corresponding winnings (using table below) to each place. Adjustments may be necessary. If so, add/subtract \$1.00 to higher/lesser winners.

(See "Flight Balancing" below.)

## Flight Balancing

**Two Flights** When there are an odd number of players in the pot, A Flight will bare the extra player on odd days of the month and B Flight will bare the extra player on even days.

**Three Flights** If three flights do not balance equally, the following schedule will prevail for:  
 One extra player: Two extra players:

| Dates                             | A | B | C | Dates                             | A | B | C |
